

# **PROJECT 1**

# **CLASSIC HTML**

# **DOCUMENT**

**DUE: TUESDAY, MARCH 4, 2021**

# PROJECT 1

Like Lab 4 ...but different

New content; a person

Content drives structure

Do **not** *just* use...

```
<header></header>  
<article></article>  
<aside></aside>  
<footer></footer>
```

...you can use those elements, but not in that exact way

# PROJECT 1 STRUCTURE

Learn more about HTML structure (Google it!)

Typical:  
HEADER  
NAV (not yet)  
MAIN  
ARTICLE  
SECTION  
ARTICLE  
ASIDE  
FOOTER  
...and others

No content in-between the structural elements (think *scaffolding*)

Remember: can use elements multiple times! (except **MAIN**)

# OTHER NOTES

FIGURE and FIGCAPTION  
...not required

Required: data table

- Know what is a "data table"
- No "inline styles"
- No old fashioned styling attributes: cellpadding or cellspacing
- Okay to use table-structure attributes: colspan or rowspan ...and other semantically appropriate things
- OKAY to use (actually, required for Project I): the old fashioned attribute "border"  
`<table border>`  
...
